

# WIRELESS Data Plans

NEXGO Wireless is a leading provider of wireless data solutions designed specifically to meet the needs of businesses requiring end-to-end device managed connectivity.

Enabling wireless data access for all devices certified to operate on the CDMA and GSM networks of our wireless carrier partners, NEXGO Wireless offers retail and wholesale solutions for businesses requiring:

**Retail** - Traditional turnkey wireless data plans

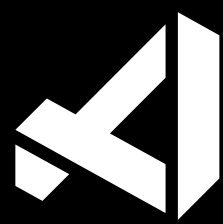

**Wholesale** - Customizable solutions that provide a fast and effective way for businesses to define, control and manage every aspect of their wireless programs.

## WIRELESS VALUE BUNDLE

The NEXGO Wireless Value Bundle includes a Wireless Payment Terminal, 1MB CDMA Wireless Data Plan, as well as 24/7 Class A Support. This provides a one-stop-shop option for ISOs, processors and banks to benefit from a combination of the high-performance features of the NX Series, along with a cost effective wireless data plan, all ready to operate out of the box. Additional benefits include:

- A fully compliant, future-proof bundled solution
- No upfront capital expenditure for compliant terminal equipment
- A single low monthly fee that covers the terminal, wireless data plan, service and support

NEXGO offers a one-stop solution for all your wireless needs.
